

Dental Pre-Anesthetic Consent Form

Many conditions, including disorders of the liver, kidneys, or heart, are not detected unless blood testing is performed. For these reasons, we highly recommend a blood screening before anesthetics are administered to your pet. An electrocardiogram is also recommended to discover any heart abnormalities prior to surgery. Pain medication will be dispensed, not optional. Please indicate your choice below:

_____ YES, I want my pet to have a pre-anesthesia blood screen. **(\$74.00)**

_____ YES, I want my pet to have an ECG (electrocardiogram). **(\$62.93)**

----- NO, I do not want my pet to have a pre-anesthesia blood screen.

----- NO, I do not want my pet to have an electrocardiogram (ECG).

Micro chipping available while under anesthesia (39.50) _____ YES _____ NO

Dental Extractions

If there are extractions needed, I will be available to be contacted at: (_____) _____

I understand that if I cannot be contacted at the above number, my pet will be recovered (woken from anesthesia) without extractions occurring. I also understand that further anesthesia will be necessary to have the teeth extracted at a future date. _____

Date: _____ **Pets Name:** _____ **Owner's Signature:** _____

*****Pets will be treated for any fleas / ticks found while in our clinic at the owner's expense*****
