

Pre-Anesthetic Consent Form

Many conditions, including disorders of the liver, kidneys, or heart, are not detected unless blood testing is performed. For these reasons, we highly recommend a blood screening before anesthetics are administered to your pet. An electrocardiogram is also recommended to discover any heart abnormalities prior to surgery. Pain medication will be dispensed, not optional. Please indicate your choice below:

_____ YES, I want my pet to have a pre-anesthesia blood screen. **(\$74.00)**

_____ YES, I want my pet to have an ECG (electrocardiogram). **(\$62.93)**

----- NO, I do not want my pet to have a pre-anesthesia blood screen.

----- NO, I do not want my pet to have an electrocardiogram (ECG).
